EurSafe 2010 Committees .................................................. 7
Preface ........................................................................... 19

## Keynote papers

Human development and food: a global vision
_R. Cloete Bullis, Y. Calomen Xena and F. Mayor Zaragoza_ .......................... 25

Designing ethical strategies for global food security
_M. Kaiser_ .................................................................. 31

Why patenting life is a controversial economical activity: European legal implementation and penal related issues
_C.M. Romeo Casabona_ ...................................................... 37

Ethical dimensions in the social perception of agrofood biotechnology: a case for an interethical approach
_E. Muñoz_ .................................................................. 46

### Part 1. Climate change policies and food security

Taming the unruly side of ethics: overcoming challenges of a bottom-up approach to ethics in the areas of climate change and food security
_R. Anthony_ .................................................................. 55

Precautionary principle and global food safety
_A. Urriuela Mora and A. Libano Beristain_ .......................... 65

Food system and climate change: the false premises of antitrust policy
_V. Sudano_ .................................................................. 73

Climate change and food insecurity: an ethical problem that cannot be postponed
_M. Nari Llaveras_ .............................................................. 79

### Part 2. Sustainable agriculture and aquaculture for global food security

Ethical reflection on a practical proposal of sustainable poultry farming
_E.L.B. Meijboom_ .............................................................. 87

Behavioural change as a key to sustainable agriculture
_C. de Lauwere, E. ten Pierick, V. Beckman and M. van Asseldonk_ ........ 91

_Global food security: ethical and legal challenges_ ................................. 9
Balanced sustainable welfare friendly animal breeding
A.M. Neeteson-van Eeuwenhoven and J.W. Hardman

The use of certain transgenic seeds in a more sustainable organic agriculture
M. de Renobales and L. Escajedo

Nanotechnology and trust in aquaculture
B.K. Mykota

BENEFISH: benefits and costs of welfare interventions in aquaculture
C.M. Mejide, S. Kadri and B. Damgård

Food sovereignty, a right to life: the case of the Peruvian Andes
L.A. Hallaci Méndez

Part 3. The role of local breeds and traditions in sustainable agriculture and aquaculture

Traditional part-time grazing: a more sustainable sheep milk and cheese production in the Basque country

Sambucana sheep: ethical and socio-economical successful outcomes of a 20-years in situ preservation program
P. Cornale, M. Renna, R. Forzina and L.M. Battaglini

The Latxa dairy sheep in the Basque Country: importance, challenges and opportunities for a traditional livestock activity
R. Ruiz, B. Díez-Unquera, I. Beltrán de Heredia, N. Mandaluniz, J. Arranz and E. Ugarte

A bio-integrated model of food production and knowledge: a study case in Ciudad del Carmen, México
L. Domínguez-Trejo, M.R. Morales-Garza and W. Cano

Autochthonous breeds, sustainable local exploitation, and quality of animal products: the case study of Piemontese cattle
M. Renna, P. Cornale, C. Lussiana, A. Minussi and L.M. Battaglini

Part 4. The role of biotechnology in food security and ethical and legal aspects of bioscience patenting

Synthetic biology, ethical challenges and its impact on food security
M. Engelhardt

Global food security: ethical and legal challenges
Climate-ready GM crops, intellectual property and global justice
C.A. Timmermann, H. van den Belt and M.J.J.A. Korthals

Transgenic livestock: a contribution to global food security?
R. Huber, C.B.A. Whitelaw and L.A.S. Olsson

Communication and biotechnology: a decade of misunderstandings
E.F. Guitard

Part 5. Eating, nutrition and health: ethical and legal considerations

Conflicting concerns in fighting obesity
K.K. Jensen

Morbid obesity in children and the law
S. Romeo and P. Nicolòs

Parental views on public-policy options regarding healthy eating

Human rights, development and hunger in the world: ethical and legal proposals
F.J. Blázquez Ruiz

Dietary disorders and mental health: a contemporaneous debate
M.F. Freire de Sá and A.C. Brochado Teixeira

Obesity in ethnic minorities and low-income populations: social and public policy considerations from a comparative study
A. Poveda, A. Jelenkovic, M.E. Banez and E. Rebato

Eating and drinking: challenges for global bioethics
T. Austin

Food policy and institutional conflict between food and health: a sociological approach to obesity in Spain
C. Díaz-Méndez

Part 6. Food labelling and consumer protection

Certification and ethical standards in aquaculture
A.S. Haugen, M. Kaiser and V. Almaas

Buyer be aware: the ethics of food labelling reform and ‘mobilising the consumer’
X. Frolich

Global food security: ethical and legal challenges
Part 7. The role of ethical engagement and public participation in EU food governance

Food citizenship: is there a duty for responsible consumption?
J. De Tavernier

Willingness to pay for farm animal welfare: consumers’ motives and expectations analysed at the example of dairy cows in Germany
M. Henseleit

The role of NGOs in food security
E. Eissen

Governance addressing societal values
V. Almaas and M. Kaiser

Reducing meat consumption: ethical arguments in the context of today’s consumer society
E. de Bakker and H. Dagevos

Making sense of demands for the integration of ethics into the regulation of GMOs
E. Lord and L. Léronneau

Sociable swine: engaging society’s values into a sustainable pig breeding research programme that aims for balanced improvement in productivity and welfare
M. Benard and T. de Cock Buning

Part 8. Ethics of bioenergy production

Bioenergy and agricultural land use: examining the framing of the ethical debate
C. Gamborg, K. Millar and P. Sandoe

Searching words for sustainable biofuels
L. Landeweerd, M. van der Veen and P. Osseweijer

Global food security: ethical and legal challenges
Bioenergies: unveiling the ethos of the agrarian research
M. de Latte-Gasquet, D. Vermersch, M. Burztyln and P-H. Duée

Biomass production for energy usage in Bavaria: an ethical assessment using a case study comparison of rapeseed and sorghum
C. Darnberger, B. Formnowitz, H. Grimm, A. Uhl and M. Ziehler

Part 9. Animal welfare

Designing a computer game for pigs, to explore and redefine the interface between animal welfare, science and ethics
C.P.G. Driessen, M.B.M. Brucke and M. Copier

Specifying animal welfare standards: ethical issues
P.B. Thompson

Animal welfare: between governmental and individual responsibility
L. Hæringen

The ethical basis of using animals in agricultural production: consumer understandings
S. Kupala, P. Jokinen and M. Vinnari

Assessment of farm animals and intersubjectivity
F. Karlsson

Animal welfare regulations in the EU: a matter of ethics or a matter of human economic interest?
M. Landera-Luri

Effects of feed supplements on meat quality: an ethical analysis that includes the welfare and health of production animals and human consumers
E.L.B. Meijboom, M.B.M. Brucke and F.J. van der Staay

Part 10. Animal biotechnology

Animal ethics committees, democracy and decision-making
H. Rücklinberg

Is there more to life than welfare? How the concept of animal integrity can contribute to discussions of animal ethics
M. Gjeris and C. Gamborg

Some legal and ethical aspects of xenotransplantation in light of the proposed revision of the Directive on the protection of animals used for scientific purposes
M. Jorquici Azofisa

Transgenic animals: Spanish legislation
A. Enalde Cirián

Global food security: ethical and legal challenges
Part 11. Animal research and animal disease control

Moral status of the African catfish
B. Bovenkerk and F. Meijboom
390

Why don’t they just pull themselves together and eat less? Public perceptions of animal use in obesity research
T.B. Lund, J. Lassen and P. Sandoe
395

Rite of passage to brute science with bias at the bench? Widening the ethical discussion of animal-based research
L.A.S. Olsson, O.E. Varga and P. Sandoe
400

Assessing the benefit of animal experimentation
O.E. Varga, P. Sandoe and L.A.S. Olsson
406

Attempt to typologize relations between different worlds (human, animal, living) based on legal and ethical questions surrounding the status of GM fish
I. Contelles and I. Doussan
412

Genomics and animal health: use of animals in biomedical research
B.M. Jugo, A. Larruskain, K. Garcia-Etxebarria, I.I. Mazon and Miren Gorrotxategi Azurmendi
418

Part 12. General questions on animal ethics

Do animals count for less?
T. Visak
423

Doing better: John Dewey’s meliorism as a method for bringing animal ethics into practice
H. Gronn
429

The argument from marginal cases: a response
I. de Miguel Bertain
435

Part 13. Teaching ethics, animal welfare and law for the biosciences and agri-food sector

How ethics is taught by European veterinary faculties: a review of published literature and web resources
M. Magalhães-Sant’Ana, L.A.S. Olsson, P. Sandoe and K. Miller
441

Food ethics dilemma: an open learning resource for teaching ethics
A. Alger, M. Kaiser, C. Kallum, H. Loor, K. Widighseen and S. Welin
447

Global food security: ethical and legal challenges
Politics and ethics of transparency

New version of animal ethics dilemma allows students to make use of science, drama and images in ethics learning
A.J. Hanlon, A. Alger, T. Dick, T. Hansen, S.B. Christiansen, H. Løv and P. Sandoe

Shifting minds? The effect of training in laboratory animal science on researchers’ attitudes to animal use in biomedical research
N.H. Franco, J.A. Naves and L.A.S. Olsson

Policy, ethics and animals use; the need for training: a Dutch example of training civil servants in ethics
F.R. Staffen, H.M.J. van Rij and E.L.B. Meijboom

Transgenic foods: science, safety, law, and ethics
M. de Renobales, L. Escayga and M. Martínez de Panchorbo

European higher education area and teaching law and ethics in the biosciences
M. Gorrotxategi Azurmendi

Part 14. Ethics, food policies and the case of GMO’s

Widening the perimeter: economics, philosophy, ethics and the quest for vital questions
A. Tsioumantis

Redefining the EU agricultural policy under market constitutionalism: from protectionism to competitiveness
A. Lasa López

The dignity of living beings with regard to plants: a brief commentary
I. de Miguel Beriain

Shifting schemes of naturalness
P.F. van Hapen, B. Greven and J. Jacobs

Ignored bioethics? On the role ethical concerns in GM food policies
J. Lassen

Part 15. Ethical, legal and social issues concerning new systems, components and foodstuffs

The farm-to-fork approach of food security concerning chemicals (with special reference to REACH, a ‘new’ European Community Regulation)
E. Aliencz-Macías

In vitro meat: promises and responses: cooperation between science, social research and ethics
C. van der Wee

Global food security: ethical and legal challenges
Part 1

Legal and ethical challenges regarding edible in vitro meat production
E.J. Armaza-Armaza and J. Armaza-Galdos

Safe and socially robust development of nanofood through ISO standards?
E.M. Forsberg
