

Inter-University Chair in Law and the Human Genome

Researchers of the Inter-University Chair in Law and the Human Genome take part at the ERAB Conference

Several researchers of the Inter-University Chair in Law and the Human Genome have been invited to take part in the [European Research Area Board Conference](#) (ERAB), under the title “*Preparing Europe for a new Renaissance*” which took place on May 6 - 7, 2010, in Seville, Spain. The most relevant representatives involved in the construction of the European Research Area (ERA), both in public and private circles, took part in order to discuss the implementation of a strategic vision for this area.

Professor Carlos María Romeo Casabona, the only Spanish ERAB (European Research Area Board) representative, presided over the Second Session, entitled: “*Is the ERAB Strategy 2030 ambitious enough?*”.

The Chair was also represented by Dr. [Aitziber Emaldi Cirión](#), Dr. [Pilar Nicolás Jiménez](#), Dr. [Iñigo de Miguel Beriain](#) and Dr. [Sergio Romeo Malanda](#), given that the Conference paid special attention to the opinions of young researchers today, who will be the leaders of research and will make research policy decisions in 2030 and beyond.
